LAUREATE INTERNATIONAL UNIVERSITIES

Promoting critical thinking so you learn to think and not just study. To keep you going, doing, growing and experimenting. **That's the essence of the university.**

Activating your talent is the best way to evolve, learn and train.

Curiosity is that spark that moves you and brings out the best in you, time and time again. **Because being demanding means having the ambition to find something you're passionate about** and, when you know what that is, wanting to discover new things.

QUESTION  
EVERYTHING

---

# The most advanced educational model

The Bachelor's Degree in Dentistry at Universidad Europea provides you with the scientific training you require to become a competent professional, with skills and knowledge that will provide you with a head-start when entering the workplace. Because **resolving clinical issues and learning about procedures, skills and techniques with exclusive simulation using the latest technology** enables you to create an impressive professional profile that is more complete and receives greater recognition.

You will have access our **virtual-reality simulation classroom that are the first of their kind in Spain**. It will enable you to operate almost as if you were operating on a real patient, and gain approximately **1,000 hours of practical experience at our university dentistry clinics** where you will treat real patients under the supervision of your professors, all of whom are respected professionals. At these two clinics, which see more than 94,000 cases and dispense more than 160,000 courses of treatment each year, you will learn with the aid of the most advanced technology (**operating microscopes, Vistascan, CBCT, Intraoral Scanners, Smile Design, etc.**) and with totally computerized systems (computerized clinical histories, requests for material, budgets, etc.), which provide training in the **latest techniques, trends and technology in the field of dentistry and dentistry management**.

At Universidad Europea we innovate to transform you into a professional with the ability to contribute to society by improving people's health and quality of life.

# Added value of studying Dentistry at Universidad Europea

## ▶ **A groundbreaking, highly innovative assessment system**

Thanks to the practical activity assessment platform, the first system of its kind in Spain, implemented by our teaching staff, your work and practical experience are assessed as objectively as possible, since before exams start, you know what aspects will be assessed and what the criteria of this assessment will be.

## ▶ **Respected faculty**

All your professors are practicing professionals with demonstrable work, teaching and research experience in all areas of dentistry. They combine in-depth training with approachability and motivation to help you achieve your best academic and professional performance and to familiarize you with the real professional world.

## ▶ **Leading facilities to bring out the best in you**

You have access to rooms with anatomical models for basic practice and realistic and highly realistic dentistry simulation laboratories. You also have at your disposal our virtual-reality simulation classroom that is the first of its kind in Spain. It will enable you to operate on the mouth of a virtual patient almost as if you were operating on a real patient. Thanks to this system, you can also review the procedure you have performed in order to see areas to improve on.

## ▶ **Internships at our own university clinics**

Do your clinical practice at one of Universidad Europea's two university dentistry clinics in downtown Madrid, where you will be assisted by professors with a solid clinical background in comprehensive diagnosis and treatment of real patients.

## ▶ **International training to take you further**

Receive the training you need for an increasingly globalized market. Your classmates are from all corners of the world, making the campus an international and multicultural setting. You can also complete your training at respected universities around the world, thanks to our Erasmus and International Laureate Network agreements.
