 **Bachelor's
Degree**

**Universidad
Europea Madrid**

LAUREATE INTERNATIONAL UNIVERSITIES

Promoting critical thinking so you learn to think and not just study. To keep you going, doing, growing and experimenting. **That's the essence of the university.**

Activating your talent is the best way to evolve, learn and train.

Curiosity is that spark that moves you and brings out the best in you, time and time again. **Because being demanding means having the ambition to find something you're passionate about** and, when you know what that is, wanting to discover new things.

QUESTION
EVERYTHING

The most advanced educational model

With the **Bachelor's Degree in Psychology from Universidad Europea** you receive a practical education, supported by learning based on **resolving cases and on simulated practice with actors** in rooms equipped with the latest technology, in which you can interact, and view and discuss cases. More than 600 hours of practical experience over the course of the entire curriculum, in which you will attend external clinics from the third year onwards, and observe clinical practice with real patients.

Thanks to our **methodology, which is first of its kind in Spain**, you will share activities with students from other healthcare disciplines to learn to work in multidisciplinary teams, just as you will in the professional world. Because we believe that the closer you are to the real world that you will face on a daily basis, the more you will take that knowledge on board and apply it.

Another feature of the degree is that **you can study in English and take part in mobility programs** offered to you by Universidad Europea, both at Erasmus program universities and at Laureate group universities around the world.

At Universidad Europea we innovate to transform you into a professional with the ability to contribute to society by improving people's health and quality of life.

General Healthcare Psychologist

In order to obtain the qualification for the profession of General Healthcare Psychologist, you must take the Master's Degree in General Healthcare Psychology. As a student at Universidad Europea you will be given the opportunity to take this Master's Degree at our University.

Added value

of studying Psychology at Universidad Europea

▶ **Teaching with a focus on simulated practice**

You will take part in simulated practice with actors from the second year onwards, to put into practice everything learned in the classroom. This approach sets us apart from other universities, and acquaints you with the professional world.

Simulation will also be used as a successful assessment method thanks to Structured Objective Clinical Assessment (ECO), where clinical case scenarios are simulated so that the professor can assess your skills in different clinical situations.

▶ **A pioneering and fully innovative work methodology**

You will complete part of your education working on interdisciplinary teams, sharing activities with students from other health sciences departments. This is a work methodology that is the first of its kind in Spain, allowing you to learn to interact with other professionals, just as you will do in the professional world.

▶ **A highly-qualified faculty**

Most of your professors combine teaching with their professional activity in the different fields of psychology. Their experience enables them to expose you to the reality of the profession from the first day, developing your skills and abilities in real-life situations.

▶ **International training to take you further**

Living on a campus with students from other countries lets you learn about their culture and their approach to psychology. You can also study Psychology in English or in Spanish. And, if you like, you can complete your education at respected universities in more than 80 countries, thanks to our Erasmus, Garcilaso and International Laureate Network agreements.

▶ **Internships with prestigious centers and institutions**

Do your clinical practice in external centers from the third year onwards thanks to collaboration agreements in place with leading psychology centers and institutions, notably CUPIF ("Asociación con un pie fuera"), Gabinete de Psicología Clínica Consulta Abierta, Gabinete de Psicología Clínica Con o Sin Diván, Down Madrid, Colegio de Psicoanálisis de Madrid, Gabinete de Psicología Clínica del Desarrollo (PSISE) or Proyecto Hombre, etc.
