

Bachelor's Degree in Dentistry

School of Medicine

The Bachelor's Degree in Dentistry provides our students with a comprehensive scientific training of the highest quality without neglecting other values that are also very important for being a good dentist, such as ethical principles, effective communication, both with patients and with other professionals, etc.

All of this is possible thanks to an excellent combination of theory-based and practical training. Basic core subjects that are the basis of scientific knowledge are covered during the first years, while the final years focus on more practical work, as well as more specialist subjects of dentistry.

This profession has always had, and continues to have, an important demand in society, opening doors to a wide range of employment opportunities. Not only in the private sector, whether working for others or setting up your own dentist clinic, but also in the public sector, both inside and outside of Spain. In addition, nowadays more and more interesting lines of research are emerging, such as those on new materials for dental implants or treatments for different conditions, etc.

To facilitate the student's future integration into professional life, this degree offers comprehensive, theory-based and practical training, thanks to which our students acquire the clinical skills necessary to meet the demands of oral health within society. We also encourage our students to develop professional attitudes and behaviors for effective and adequate interaction with patients and other health professionals.

OBJECTIVE OF THIS DEGREE

The primary aim of the Degree in Dentistry is to train professionals in the field of oral health so that they can apply the knowledge and skills acquired during the degree to assess, diagnose and treat patients' needs in this field in an optimal way, as well as to promote healthy living habits.

Through prestigious teaching staff with extensive experience in the field, students receive balanced training in all aspects related to dentistry: abnormalities and diseases of the mouth, jaws and surrounding tissues. In addition, we offer training that goes beyond mere knowledge, drawing from ethical principles whilst taking social skills into account, including good communication with the patient, so that the graduates can carry out their profession according to values such as respect and dignity.

At our university, we are committed to academic and professional excellence, as well as to the comprehensive training of our students, teaching quality, innovation, research, internships, internationalization and to the crucial full employment of our students.

At the end of this degree, students will have acquired the knowledge, skills, attitudes and competences that will enable them to independently practice dentistry with optimal results. We also encourage our students to appreciate the need for professional development and lifelong learning, as well as the effective harnessing of advances in knowledge and technology.

Features

Campus: Montepíncipe

Duration: 5 years (300 ECTS)

Language: English

CEU | *Universidad
San Pablo*

CEU
Universities

Programme

First Year

Introduction to Investigation and Statistics	6
Human Anatomy	9
Biology	6
Introduction to Dentistry	6
History of Dentistry	6
Anthropology	6
Preventive Dentistry and Public Health	6
Psychology	6
Physiology	6
Biochemistry	6

Total ECTS **60**

Second Year

Modern Language	6
Biomaterials	6
Microbiology	3
General Pathology	6
Immunology	3
Pharmacology	6
Histology and Pathology	6
Surgical Emergencies	3
Medical Emergencies	3
Anesthesia and Resuscitation	3
Physiopathology and Surgical Basics	3
Social Doctrine of the Catholic Church	6
Basic Periodontics	6

Total ECTS **60**

Third Year

Prosthesis I	6
Pathology and Dental Therapeutics I	6
Surgical Oral Pathology I	6
Orthodontics I	6
Pediatric Dentistry I	6
Prosthesis II	6
Pathology and Dental Therapeutics II	6
Surgical Oral Pathology II	6
Orthodontics II	6
Gerodontology	2
Dentistry for Special Patients	4

Total ECTS **60**

Fourth Year

Prosthesis III	6
Orthodontics III	3
Oral Medical Pathology I	3
Pathology and Dental Therapeutics III	6
Implantology	4
Advanced Periodontics	2
Pediatric Oral Surgery	6
Prosthesis IV	6
Orthodontics IV	3
Oral Medical Pathology II	3
Pathology and Dental Therapeutics IV	6
Pediatric Dentistry II	6
Cosmetic Dentistry	3
Implant Prosthesis	3

Total ECTS **60**

Fifth Year

Community Dentistry	6
Dissertation I	3
Integrated Dental Clinic I	12
Advances in Temporomandibular Joint (TMJ) Pathology	3
Radiology	3
Dissertation II	3
Integrated Dental Clinic II	12
Maxillofacial Surgery	6
Ethics and Deontology	3
Forensic Dentistry	3
Science and Trends in Dentistry*	3
Basics of Health Care Economics and Management of Medical Resources*	3
Primary Care in Dentistry*	3
Management and Marketing of Dentistry Clinics*	3

Total ECTS **60**

* *Optional course.*
