Why did you decide to go to University?

In order to prepare yourself for what comes next, the future.
And the future is the real world.

At Universidad Europea, we focus on the **professional** that you want to be and on providing you with a **practical training** that enables you to work on your future from day one.

We call for your own **progress and development**, for you to go beyond, offering you the help you need but never forgetting that you are in the driving seat.

This makes Universidad Europea **more than just a university**.
And you **more than just a student**.

Universidad Europea's
Certifications.

Bachelor's Degree in Dentistry

Differential Ratios

Do you want to take care of smiles?

Dentistry is advancing by leaps and bounds. Scientific and technological advances are transforming this profession. Professionals in this field have to be prepared to meet expectations and needs that society is going to demand and we will show you how.

That is why the Universidad Europea is committed to training based on new teaching methodologies and by the application of the latest technologies, experimenting sensations almost identical to those you will have in a real patient or in our simulated environments where you prepare to act in any situation or emergency unexpected.

Knowledge, innovation and clinical practice

In their clinical preparation, students are trained in the latest trends and techniques in the dental field, use the most advanced technological resources and with the support of teachers with a great clinical experience, perform the diagnosis and comprehensive treatment of their patients, thus offering them the highest quality of care.

Pioneer evaluation system

Gain self-confidence and ensure that you have achieved the learning objectives expected in each course through proficiency tests: Objective Structured Clinical Evaluation, pioneering platform in Spain and launched by our professors.

Bachelor's Degree in Dentistry

Differential Ratios

Advanced technology

Train your skills and abilities in the medium and high fidelity dental simulation laboratories and in a pioneering virtual reality simulation classroom in Spain, to offer quality treatment in a safe and true-to-reality environment before working on the mouth of a real patient.

Practical work in basic subjects in the dissection room, biology laboratories, etc., and in rooms with three-dimensional anatomical models and augmented reality in order to know the organs on which to apply your treatments.

Unique installations

Acquire from the beginning the skills and abilities necessary for patient care in the Dental Consultations located in our Simulated Hospital (Madrid Campus), a safe and true-to-reality environment, where you learn to deal with multiple simulated clinical and even emergency situations,

learning to interact with other students in the area of health and to make correct decisions.

Prestigious faculty

All your professors are practicing professionals with demonstrable work, teaching and research experience in all areas of dentistry. They combine in-depth training with approachability and motivation to help you achieve your best academic and professional performance and to familiarize you with the real professional world.

Internships in our own clinics

From the fourth year onwards, a large part of your training will be carried out in our University Dental Clinics. With 900 hours in which you will treat real patients, from diagnosis to comprehensive treatment, under the supervision of your professors. The clinics have more than 94,000 consultations and perform more than 160,000 treatments a year. There, you'll

learn about fully computerized systems and the latest dental and management trends and technologies.

At the end of your clinical training you will have carried out treatments in the different dental specialties including endodontics, prostheses and surgery.
